# ABOUT US

*Bharti General Manufacturer, established in the year 2017, is a well-recognized business entity providing a comprehensive range of Container Door Locks and Container Lock Pipe Fittings in various sizes. Utilizing the latest locking system technology, we are successfully manufacturing a variety of Container Male/Female Lock and Fittings, according to the customer requirement, targeting different segments of the market. Our Complete Container Lock Set with Door Hinges and Fittings are available in various sizes and designs comprehending with the specifications provided by the customers. Our highly experienced team members help us take the access, safety and convenience to a whole new level. The team design locks keeping security in mind with exceptional features such as robust structure, high-end functionality and durability. Along with quality products, we ensure that prompt and reliable support services are provided to customers, spreading across the country.*

## **Capturing the Essence of Our Business**

*We live by the promise of customers first and associate all our business endeavours in relevance to the customers interest: qualitative products like Container Rivet, Container Parts & Accessories, Container Door Locks, etc., competitive prices and continuous support. Our business culture within and outside the premises is built upon our unwavering loyalty to our clients, which is strategically focused on creating a framework that drives lasting business relationships with customers. Here are some factors that depict the true essence of the company:*

- 1. Quality: It is the dominant factor in our business, which is both relevant to products and practices, wherein we follow a set of practices that help us to deliver high-quality products. These practices include use of premium grade raw material and supervision of the manufacturing process rigorously*
- 2. Professionalism: High level of professionalism is maintained in carrying out every business activity, ensuring 100% customer-satisfaction in everything we do*
- 3. On-time delivery: We assure on-time delivery of Complete Container Lock Set with Door Hinges and Fittings, as per the commitment made to the client*
- 4. Competitive pricing: Our products are competitively priced, owing to the judicious utilization of the resources*

## **Our Infrastructure**

*We are equipped with robust infrastructure facility categorized into different segments like machining unit, forging from guest units, quality control unit, and packing unit. Each unit is well-facilitated with various machines and tools to manufacture products in accordance to the market standards. All the units are manned by qualified and technically-proficient members, who are committed to delivering high-value solutions.*

## **Competent Workforce**

*Our recruited employees are confident, honest, sincere and talented who empower us to come up with an outstanding array of Container Parts & Accessories, Container Rivet, Container Door Locks, etc. They are competent enough to accept any kind of market challenges and handle them with utmost patience and efficiency. They always give their best in every single task, in the pursuit of excellence.*

# PRODUCTS

## CORNER CASTING (MEDIUM)

Corner Casting (MEDIUM) offered by us has been fabricated using superior quality steel alloy for having excellent weight bearing ability and high structural strength. It is most commonly required for locking shipping container in a place in order to prevent its movement while transportation. This block is applied at corners of containers and is secured with help of proper locking system. It is highly appreciated for having ability to bear adverse climatic properties and resist wear & abrasion. Corner Casting (MEDIUM) is available in different structural & dimensional configurations as demanded according to client's need.

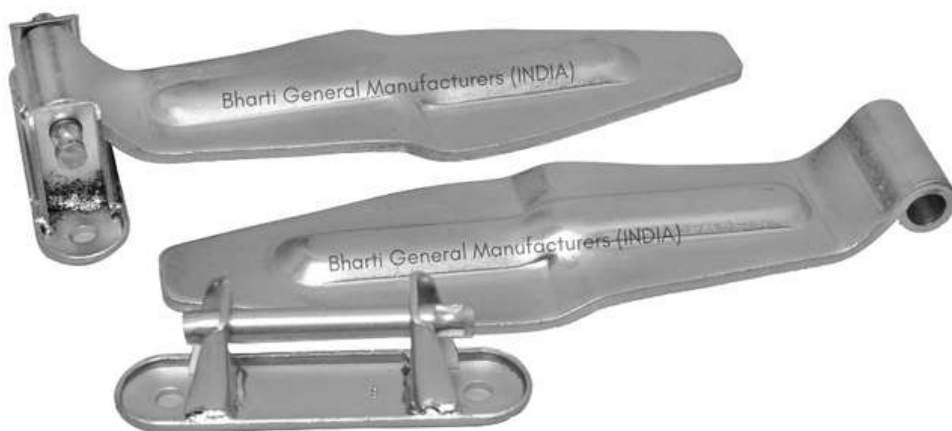

AN ISO 9001:2015 CERTIFIED CO.

## FISH TYPE HINGES FOR REFEREGRATED CONTAINERS

Fish Type Hinges For Referegrated Containers is required for installation of doors on shipping containers assuring their smooth opening & closing. It is made of high grade metal alloy with corrosion protective coating on its surface. This hinge sheet is specifically designed to be used for containers that are intended for shipping food items & pharmaceuticals. It is known to allow air-tight closing of door in order to maintain optimum internal temperature. Fish Type Hinges For Referegrated Containers offered by us is dimensionally accurate in nature and assures easy installation with high durability & reliability.

AN ISO 9001:2015 Certified Co.

FISH TYPE HINGES FOR REFEREGRATED  
CONTAINERS

AN ISO 9001:2015 CERTIFIED CO.

## INSERTS FOR BIG CLAMP (HEAVY)

Inserts For Big Clamp (HEAVY) is manufactured under technically advanced unit and surveillance of our skilled professionals. It is required for installation of pipes on doors of shipping containers for holding them securely in place. Nylon lining provided to this clamp enhances its life and performance. It is said to have hassle-free installation with high reliability and no maintenance requirement. This clamp is admired for having ability to bear good amount of impact & vibration with superior wear resistance. Offered Inserts For Big Clamp (HEAVY) has been tested on stringent quality parameters so as to deliver one of the best products to our customers.

AN ISO 9001:2015 CERTIFIED CO.

## INSERTS FOR LIGHT PIPE CLAMP

Inserts For Light Pipe Clamp is required for holding pipes securely in place and allow their optimum rotation. It is made having superior quality nylon thermoplastic lining which provides excellent performance in all climates. This clamp is secured with help of appropriate fasteners that are applied on doors. It has 'U' shaped structural configuration with smooth surface finish. Inserts For Light Pipe Clamp offered by us is said to have good structural strength with high durability & reliability. It can be availed at competitive rates in bulk amounts as required according to need of customers.

AN ISO 9001:2015 CERTIFIED CO.

## INSERTS FOR SMALL PIPE CLAMP (HEAVY)

Inserts For Small Pipe Clamp (HEAVY) is perfect for locking bolts in both horizontal & vertical directions for assuring their long life & trustworthiness. It has been profiled so as to easily accommodate extra length with same performance. This clamp is designed having holes for bolting purpose after securing pipe within its profile. It is known to have ability to bear adverse conditions and resist high amount of impact. Inserts For Small Pipe Clamp (HEAVY) is highly durable in nature and assures utmost dimensional & structural precision.

AN ISO 9001:2015 Certified Co.

INSERTS FOR SMALL PIPE CLAMPS (HEAVY)

AN ISO 9001:2015 CERTIFIED CO.

## ISO CORNER CASTING (HEAVY DUTY)

ISO corner casting (HEAVY DUTY) is designed having a cubical structure with specific holes on its faces that are formed using casting process. It is made of high grade steel alloy with corrosion protective coating on surface to provide trustworthiness & durability. This block is fitted to its female part which is already present at container's corner with help of its oval hole. It is said to be completely reliable in nature and assists in lifting of container for loading & unloading purpose. Offered ISO corner casting (HEAVY DUTY) is greatly admired for having excellent pressure & weight bearing ability with superior wear & abrasion resistance.

ISO CORNER CASTINGS (HEAVY DUTY)

## NYLON LINING FOR CONTAINER HINGES

Nylon Lining For Container Hinges are type of bearing that is required for installation of pipes & locking system. They are highly appreciated for having superior structural strength and deformation resistance with long service life. These bushes are also admired for their smooth internal & external surface finish which allows bearing surface for movement of rotating assemblies. They are known to assure easy installation and replacement whenever required in hassle-free manner. Nylon Lining For Container Hinges offered by us are available at highly competitive prices in bulk amounts as demanded by our respected clients.

## C-CLAMP FOR CONTAINER HINGES

C-clamp for container hinges offered by us has been fabricated using forging technology in order to provide sturdy structural configuration and high durability. It is required during installation of door onto shipping container for securing it with hinges. This clamp is provided with CNC drilled holes that allow easy & secure bolting. It is known to have tough structural configuration with high durability & reliability. This U clamp is strong enough to withstand adverse conditions & very high amount of impact. C-clamp for container hinges can be availed at reasonable rates in bulk amounts as per client's demand.

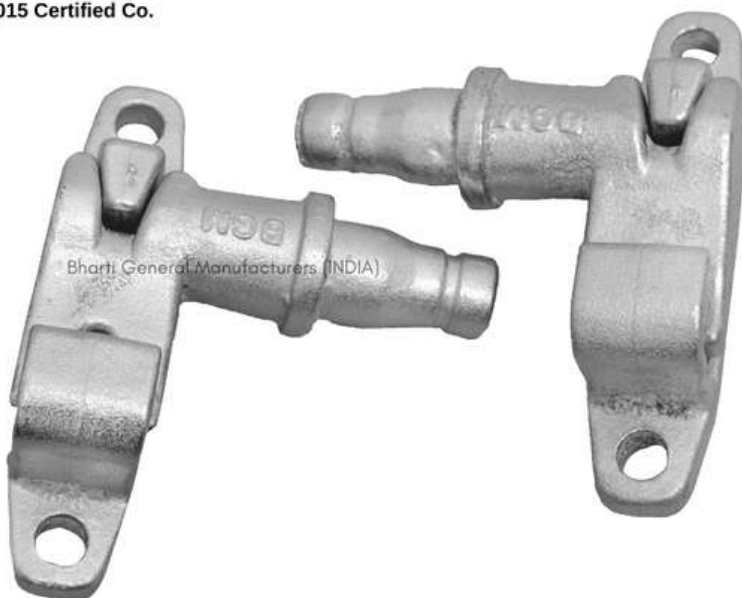

AN ISO 9001:2015 CERTIFIED CO.

## **CAM AND KEEPER (BOLTING TYPE)**

Cam And Keeper (Bolting Type) is locking structure which is required which installed on doors of shipping containers. It is known to have simple but secure locking system which eliminates chances of counterfeiting & theft. This set is made of high grade steel alloy with electro galvanized surface finish resulting in protection from corrosion. It does not have any negative effects of adverse climates & working conditions and can easily be replaced whenever required. Cam And Keeper (Bolting Type) is provided at highly competitive prices in bulk amounts as requested by our customers.

AN ISO 9001:2015 Certified Co.

**CAM AND KEEPER (BOLTING TYPE)**

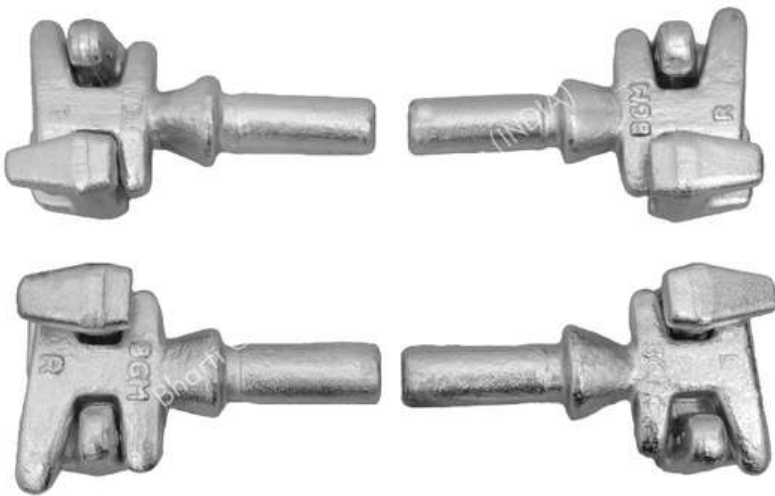

AN ISO 9001:2015 CERTIFIED CO.

## CAM AND KEEPER (HEAVY DUTY)

Cam And Keeper (Heavy Duty) has been designed using advanced CNC machines for providing utmost structural precision and assuring excellent performance. It is said to have easy installation with long service life and reliability. This lock is applied on door of shipping containers for securing them against theft & unwanted door opening during transportation. It is made of high grade steel alloy with zinc coated surface finish to provide protection from corrosion. Cam And Keeper (Heavy Duty) has latch-based locking mechanism with ability to resist high amount of impact and deformation. It is available in different sizes at highly competitive prices for our trusted clients.

AN ISO 9001:2015 Certified Co.

CAM AND KEEPER ( HEAVY DUTY)

AN ISO 9001:2015 CERTIFIED CO.

## **CAM AND KEEPER (LIGHT DUTY)**

Cam And Keeper (Light Duty) has been designed using advanced CNC machines for providing utmost structural precision and assuring excellent performance. It is said to have easy installation with long service life and reliability. This lock is applied on door of shipping containers for securing them against theft & unwanted door opening during transportation. It is made of high grade steel alloy with zinc coated surface finish to provide protection from corrosion. Cam And Keeper (Light Duty) has latch-based locking mechanism with ability to resist high amount of impact and deformation. It is available in different sizes at highly competitive prices for our trusted clients.

AN ISO 9001:2015 CERTIFIED CO.

## CAM AND KEEPER (MEDIUM)

Cam And Keeper (Medium) has been designed using advanced CNC machines for providing utmost structural precision and assuring excellent performance. It is said to have easy installation with long service life and reliability. This lock is applied on door of shipping containers for securing them against theft & unwanted door opening during transportation. It is made of high grade steel alloy with zinc coated surface finish to provide protection from corrosion. Cam And Keeper (Medium) has latch-based locking mechanism with ability to resist high amount of impact and deformation. It is available in different sizes at highly competitive prices for our trusted clients.

## CONTAINER HANDLE ASEMBLY FORGING TYPE

Container Handle Asembly Forging Type offered by us is provided with CNC drilled holes for applying extra lock after closing door in order to provide added protection. It is required for easy pulling of container door for opening and locking after closing. This handler is always installed in conjunction with a metal rod which allows its movement. It is hassle-free to install and assures complete safety during transportation. Container Handle Asembly Forging Type has been made of tough steel alloy using forging technology in order to ensure high durability & reliability.

AN ISO 9001:2015 Certified Co.

## CONTAINER HANDLE RETAINER BOTTOM

Container Handle Retainer Bottom is a simple thick metal structure which is applied onto door with help of rivets or other fasteners. It is required for securing & locking handle of the door with application of a lock. This clamp is known to have hassle-free application and is provided with galvanized surface finish to prevent corrosion. It is strong enough to resist pulling out due to heavy impacts and mechanical force. Container Handle Retainer Bottom has been tested on rigorous parameters so as to assure its excellent quality and reliability.

CONTAINER HANDLE RETAINER BOTTOM

AN ISO 9001:2015 CERTIFIED CO.

## CONTAINER HANDLE RIVITS

container handle rivits offered by us is widely used in metal fabrication applications to fasten two or more mechanical components together to make a rigid and sturdy structure. It is a cylindrical element provided with semi spherical head at one end. Premium class of stainless steel is used for the manufacturing of this compact and robust fastening component which offers higher tensile strength for longer service life. It is available in various different sizes as per the area of applications in which it is going to be used.

AN ISO 9001:2015 Certified Co.

CONTAINER HANDLE RIVITS

AN ISO 9001:2015 CERTIFIED CO.

## CONTAINER HINGE SET ASSEMBLY MEDIUM (FORGING TYPE)

Container Hinge Set Assembly Medium (Forging Type) is used for attachment of door to its frame on shipping container. It is made using forging technology which involves treatment with high heat resulting in excellent strength & impact resistance. This hinge set is also known to assure smooth & silent movement of doors with airtight closing. It is available in different sizes & structural configurations as demanded according to client's need. Container Hinge Set Assembly Medium (Forging Type) has been fabricated using steel alloy for having good corrosion resistance and durability. It is also admired for having easy installation and replacement.

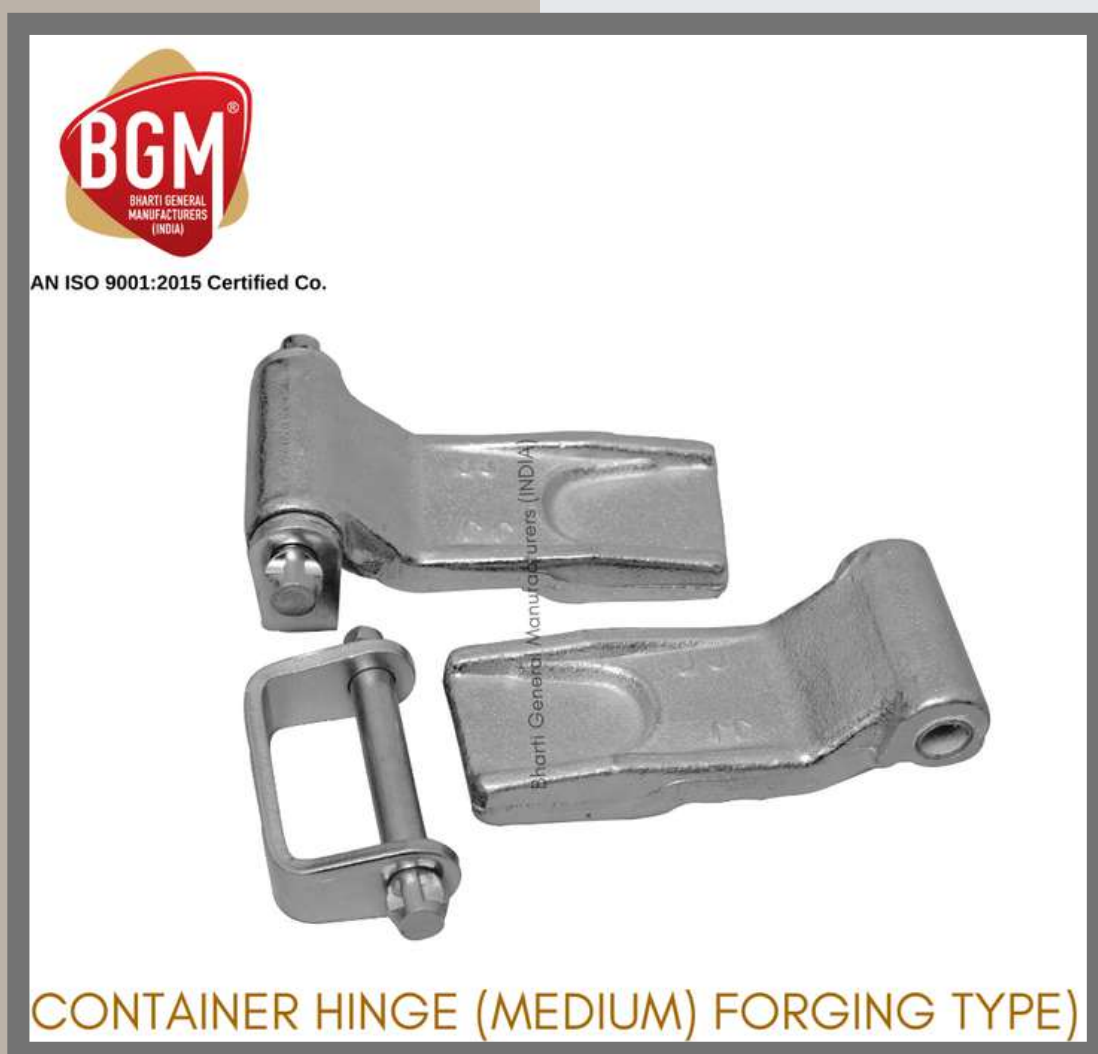

AN ISO 9001:2015 CERTIFIED CO.

## CONTAINER HINGE MEDIUM (FORGING TYPE)

Container Hinge Medium (Forging Type) offered by us is greatly admired for having superior structural & impact strength with high wear & abrasion resistance. Made using forging technology, it is a heat treated assembly which is used for connecting doors to shipping containers in easy & reliable manner. This hinge is provided in two separate parts that can quickly be connected during installation. It is also provided with molten zinc coating on surface which prevents chances of corrosion. Container Hinge Medium (Forging Type) has superior tensile strength with long lasting service life and reliability.

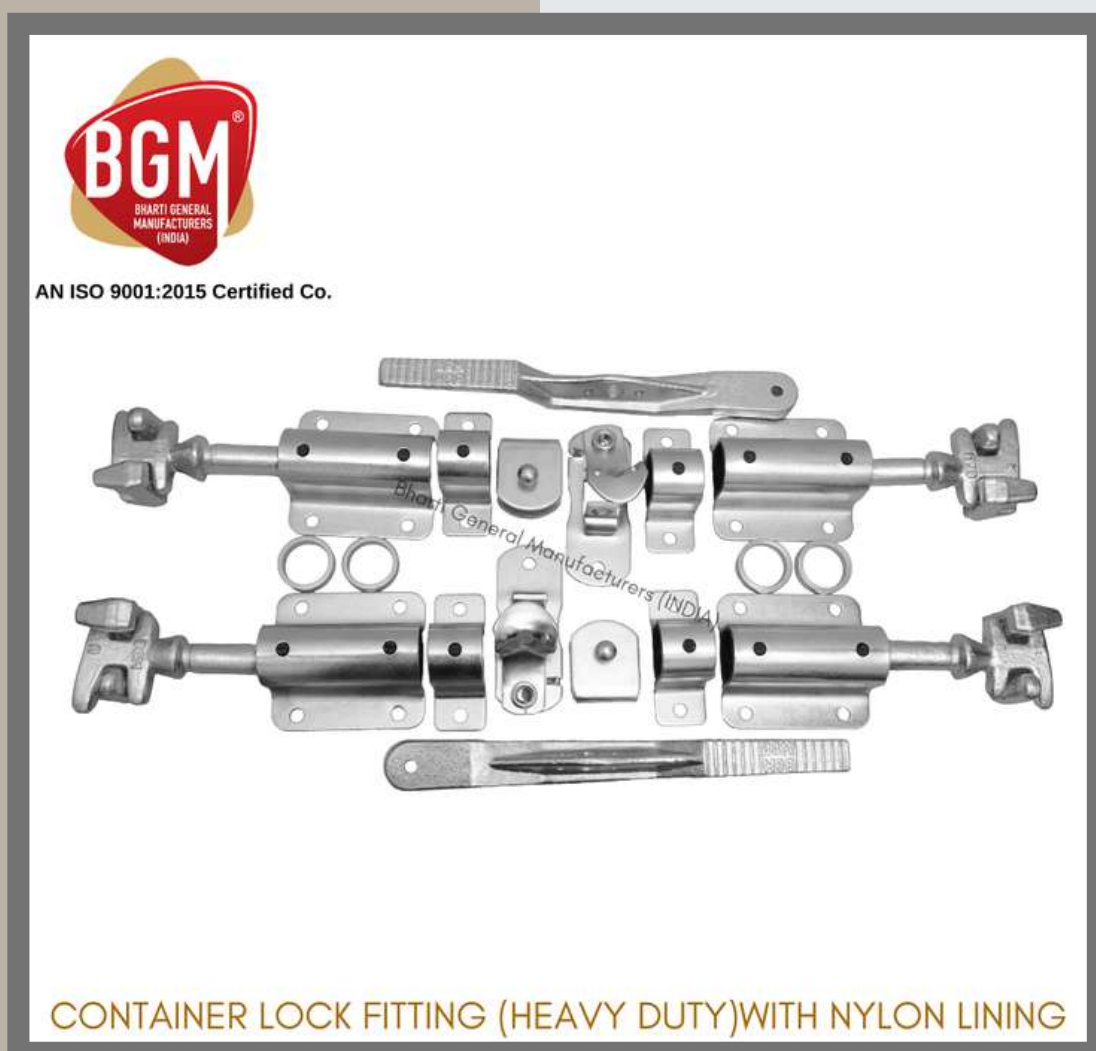

AN ISO 9001:2015 CERTIFIED CO.

## CONTAINER LOCK FITTING (HEAVY DUTY) WITH NYLON LINING

Container Lock Fitting (Heavy Duty) With Nylon Lining is a sturdy and tamper proof locking unit which is widely used to lock large shipping containers to provide extra security to the goods inside the storage unit. It is manufactured by using engineering grade stainless steel which offers high tensile and compressive strength to the locks. It is very easy to install due to the high dimensional accuracy and uniform design. Buy from us this sturdy and rigid safety component in bulk at a low price range.

AN ISO 9001:2015 CERTIFIED CO.

## CONTAINER LOCK FITTING (LIGHT) WITH NYLON LINING

Container Lock Fitting (Light) With Nylon Lining is a sturdy and tamper proof locking unit which is widely used to lock large shipping containers to provide extra security to the goods inside the storage unit. It is manufactured by using engineering grade stainless steel which offers high tensile and compressive strength to the locks. It is very easy to install due to the high dimensional accuracy and uniform design. Buy from us this sturdy and rigid safety component in bulk at a low price range.

## CONTAINER PIPE CLAMP SMALL WITH INSERTS (HEAVY)

Container Pipe Clamp Small With Inserts (HEAVY) is a U-shaped metal structure which is also provided with drilled holes for simple fastening during installation. It is said to be used for holding pipes vertically against door of shipping containers. This clamp can also be availed with thermoplastic lining for added durability & reliability. It is perfect for use on both simple & refrigerated containers with same efficiency & trustworthiness. Container Pipe Clamp Small With Inserts (HEAVY) manufactured by us is admired for having good deformation resistance and has been tested on several parameters so as to provide best quality to our clients.

AN ISO 9001:2015 CERTIFIED CO.

## CONTAINER RETAINER WASHER RINGS

Container Retainer Washer Rings is required for preventing pulling of nut, screw, or bolt through material. It is made of superior quality steel alloy with shiny surface finish in order to assure excellent structural strength & deformation resistance. This washer tightly secures bolted joints of handle lock in order to prevent unwanted opening. It is available in different dimensional configurations and at highly competitive prices for our respected clients. This Container Retainer Washer Rings is greatly admired for being completely reliable in nature and ensuring long service life. It perfectly fits within the structure and holds it securely eliminating tempering chances.

## CONTAINER LOCK PIPE RETAINER RINGS

Container Lock Pipe Retainer Rings offered by us has been made of high grade steel alloy with seamless surface finish and uniform thickness throughout its structure. It is specifically fabricated to be used for installation of metal pipe on container doors required for locking purpose. This ring is highly appreciated for assuring hassle-free fitting with long service life & no maintenance requirement. It is said to have excellent impact strength and deformation resistance. Container Lock Pipe Retainer Rings is available at reasonable prices and in different diameter sizes as demanded according to customer's need.

## CONTAINER PIPE CLAMP BIG WITH INSERTS (HEAVY)

Container Pipe Clamp Big With Inserts (Heavy) offered by us is designed having 'U' alphabet shaped structure with hinge on both sides. It is required for clamping pipes on shipping containers in vertical position that are said to be an integral part of locking system. This clamp can easily be fastened with help of bolts onto the door in order to secure pipe in its place. It is highly appreciated for having smooth surface finish with good deformation resistance. Container Pipe Clamp Big With Inserts (Heavy) provided by us is made of superior quality galvanized steel to ensure good corrosion resistance and ability to bear all climatic conditions.
